About SUMMIT

The World ESG Summit & Awards returns in 2026 for its 7th edition, marking the third time in Dubai, UAE, from 7 - 8 September 2026. Recognised as a premier ESG and sustainability gathering, the summit unites global leaders, policymakers, corporate executives, investors, and sustainability and ESG innovators to exchange ideas, drive meaningful action, and shape the future of environmental, social, & governance excellence. The summit focuses on sectors where ESG and sustainability are not just priorities, but essential mandates, spanning government and public sector organisations, banking and finance, energy and utilities, real estate and construction, petrochemicals, and more.

Over two days, participants will engage in high-level discussions, explore pioneering global practices, and co-create actionable strategies that embed sustainability into business, investment, and policy. By bringing together regulators, investors, corporate leaders, & civil society, the summit fosters collaboration, drives innovation, and empowers industries to achieve tangible ESG impact.

The World ESG Summit & Awards is where ambition meets action, connecting industries committed to responsible growth and inspiring leadership for a sustainable future. In addition to thought-provoking sessions and panel discussions, the summit provides a dynamic platform for solution providers, technology innovators, and service experts to showcase cutting-edge ESG tools and sustainable practices. Attendees gain exclusive insights into emerging trends, regulatory developments, and investment opportunities, ensuring they leave equipped to implement impactful ESG strategies within their organisations & across industries. This convergence of knowledge, expertise, and innovation makes the World ESG Summit & Awards 2026 an unmissable event for all stakeholders committed to shaping a sustainable, resilient, and inclusive future.

ABOUT SPONSORS

PLATINUM SPONSOR

SAM Corporate is a global advisory and technology firm supporting organizations with end-to-end visibility across sustainability, finance, and risk. Operating across UAE, India, the UK, the US, Singapore and Spain, the firm enables businesses to build responsible, data-driven, and resilient operations worldwide. Its ESG ecosystem includes SAMESG® Core for enterprise ESG reporting, SAMESG® Lite for emission calculation and reporting for small- and mid-sized organizations, and ESG advisory and training for strategy development and capability-building. SAM Corporate also drives digital finance transformation through automated financial close and consolidation, integrated budgeting, planning and forecasting, and comprehensive CCH Tagetik support. The company's regulatory reporting offerings cover IFRS 16 and IFRS 17.

SAM Corporate also delivers BFSI Advisory services that help financial institutions strengthen governance, compliance, and supervisory frameworks. In addition, its ALM & Risk Management services enable organizations to model liquidity, capital, interest rate sensitivities, and broader risk exposure supporting stronger financial stability and strategic resilience. SAM Corporate has a diverse client base spanning prominent family businesses, conglomerates, and group companies across industries including financial services, manufacturing, hospitality, healthcare, retail, construction, logistics, and more. With an integrated ecosystem of innovative solutions, SAM Corporate continues to support organizations in achieving stronger ESG maturity, sharper financial outcomes, and more resilient governance across markets.

For more information about SAM Corporate, visit https://samcorporate.com/

PREMIUM AI PARTNER

Coastal and dryland ecosystems are among the planet's most critical natural assets. Mangroves and seagrass store several times more carbon per hectare than tropical forests, form a natural barrier against coastal erosion and flooding, and host hundreds of threatened species alongside fisheries that feed over 100 million people. Drylands cover close to 40% of the Earth's land, regulate soil, water, and carbon, and support billions of people and nearly half of the world's cultivated systems. Yet these ecosystems are under mounting pressure. Half of the world's mangrove ecosystems are at risk of collapse by 2050, and 1 billion hectares of dryland are already degraded.

Their role has never been more vital, and they have never been this exposed. Global commitments to protect and restore them are real and growing, but the tools to execute nature-based solutions at scale have lagged behind the ambition. Nature is critical physical infrastructure that requires ongoing management, monitoring, and intervention. Yet it has no standard operating system. Today it is run largely on manual methods and one-off projects, a plant-and-hope model built for a different scale of problem. Nabat is building that operating system. NabatOS – an end-to-end AI platform that runs the full restoration pipeline, from mapping and assessment through planning, restoration, monitoring, and verification, across coastal and dryland ecosystems. It is built for the government agencies, corporate sustainability teams, project developers, and investors working to turn commitments into outcomes they can measure, manage, and stand behind.

For more information about Nabat AI , visit https:https://nabat.ai/

ABOUT SPONSORS

GOLD SPONSOR

Presgo is a future-proof, AI-first ESG reporting platform built by Azeus Systems, the same team behind trusted compliance and governance tools like ConveneAGM and Convene in Teams. Combining responsible AI and modular architecture,

Presgo enables organisations to automate ESG data gathering, streamline analysis, and produce audit-ready reports across multiple frameworks. Its flexible structure lets organisations start with the modules they need and scale as ESG frameworks and regulations evolve—ensuring continued accuracy, transparency, and compliance

For more information about Presgo, visit https://www.presgo.com/

GOLD SPONSOR

Novisto is the sustainability reporting software built for enterprises with big ambitions and lean teams. By streamlining the process of collecting and auditing standards-based data, Novisto gives reporting teams the confidence that their disclosures are accurate and reliable.

That's why brands like Velcro, Swiss Steel, Silicon Labs, Pernod Ricard and Crocs trust Novisto. Founded in Montréal in 2019, Novisto is backed by Inovia, White Star Capital, Diagram Ventures, Portage, and SCOR Ventures.

For more information about Nabat AI, visit https://novisto.com/

SILVER SPONSOR

Spectreco is a global sustainability technology, advisory, and implementation company that turns ESG data into real-time decisions. Founded in 2024 by practitioners from infrastructure, finance, and impact, it was built on one conviction: sustainability data should be as robust as financial data.Its cloud-native, AI-driven platform connects ESG, operational, and financial data. AI agents clean the data, flag anomalies, and recommend the next move, while the platform handles GHG accounting, portfolio and climate-risk analytics, and audit-ready reporting across IFRS S1/S2, GRI, CSRD/ESRS, TCFD, and other frameworks, all from a single dataset. For banks and insurers, Spectreco adds dedicated modules for climate stress testing, scenario analysis, and financed emissions (PCAF), aligned to central bank mandates.

The Virtual Sustainability Office is where Spectreco does more than advise. Its specialists run a client's ESG program end-to-end, so a working sustainability function is in place within weeks, not months, and without new headcount. Advisory teams cover climate finance, decarbonization, disclosure, and training. Spectreco works with financial institutions, real-estate owners and operators, city governments, and data centers worldwide. Each sector gets specialists who understand its regulations and economics, whether that means financed emissions for a bank or whole-life carbon for a property portfolio.

For more information about Spectreco, visit https://www.spectreco.com/

ABOUT SPONSORS

SILVER SPONSOR

Connect Earth is the Sustainable Finance OS, powering banks, asset managers, and fintechs with ESG and carbon data infrastructure to comply with regulation, engage customers, and unlock green finance. API-first, modular, and proven at scale, Connect Earth transforms compliance into growth and positions financial institutions at the centre of the sustainable transition.

For more information about Connect Earth, visit https://connect.earth/

SUSTAINABILITY PARTNER

ASF Consulting (http://asfconsulting.org/) is a Tunisian consulting firm specialized in Environmental and Social Safeguards for development projects, based in Tunisia, offering consulting services in the fields of environment, climate change, gender, social inclusion, health and safety in Tunisia and internationally, with experience (including staff references) of over 100 major infrastructure projects in the fields of energy, water, agriculture, transport, industry, education, health and urban development. ASF Consulting has served investment funds, development finance institutions, platforms and private developers in various fields, integrating environmental and social governance into projects.

ASF Consulting was founded in 2016 by Ms Awatef Siala Fourati, a senior expert in environmental and social safeguards with over 30 years' experience and excellent knowledge of international and national environmental and social standards. She has worked with climate funds (SEFA, SEforAll, CIF, GCF, etc.) and knows their procedures inside out. She has previously worked for the Tunisian Ministry of the Environment, consulting firms, the African Development Bank, the Millennium Challenge Corporation and renowned private energy platforms. Ms Awatef carries out technical assistance, ESDD and training assignments for infrastructure projects and regional development banks.

For more information about ASF Consulting, visit https://asfconsulting.org/

SOLAR ENERGY PARTNER

Yellow Door Energy provides sustainable energy solutions for businesses in the Middle East and Africa. In KSA, our solar leases help commercial and industrial companies significantly reduce energy costs, lower carbon emissions and contribute to Vision 2030 and the Saudi Net Zero Emissions by 2060 Target. With over 100 solar projects in 6 countries, our dedicated team of energy experts in Riyadh is ready to help businesses embark on their sustainable energy journey. Our shareholders are Actis, the International Finance Corporation (IFC), Mitsui & Co., Ltd., and The Arab Energy Fund (formerly APICORP).
